## PROFESSIONAL SUMMARY

- **1.5 years of experience in ERP development and customization on the Odoo platform,** mainly for internal enterprise environments.
- **5 years of experience in .NET/C# software development,** covering backend, frontend, and database.
- **Versatile team member** in a 5-person team: **primarily Developer** (backend + frontend), while also **handling testing (unit test/UAT) and technical documentation.**
- Proficient in **requirements analysis**, feature design, programming, testing, and ERP solution deployment.
- Experienced in **migration from Base to Odoo**, enabling cost savings, process optimization, and improved autonomy in technology usage

## KỸ NĂNG CHUYÊN MÔN

| | |
|---|---|
| **ERP & Low-Code Platforms** | Odoo (module development with Python, XML), migration Base → Odoo |
| **Languages & Frameworks** | Python (Odoo), C#, ASP.NET MVC/WebAPI, Entity Framework, ABP Framework |
| **Frontend** | XML, JavaScript/TypeScript, Vue.js, Angular, jQuery, Bootstrap, MaterialUI |
| **Database** | MS SQL Server, MySQL, Oracle, Postgres |
| **Testing & DevOps** | xUnit, NUnit, UAT, Git, Docker (setup development environment & containerized deployment for Odoo/.NET systems) |
| **Documentation & Design** | BRD, Technical Specification, UML, REST API design |
| **Task/Bug Management** | Jira, Youtrack |
| **IDEs/Utilities** | Visual Studio Code, Visual Studio, Postman, Dbeaver,… |
| **Operating Systems** | Linux-based, Windows |
| **Languages** | English – Basic (able to read technical documents, write emails, and handle simple work communication) |

## WORK EXPERIENCE

| | |
|---|---|
| **Nagakawa Corporation**<br>*ERP Developer (Aug 2023 – Present)* | **Project:** Internal ERP System for Manufacturing Enterprises<br>**Description:** Built an ERP system tailored for medium-sized manufacturing businesses to digitize processes: proposal & approval, project planning, HR management, internal announcements, operations overview, accounting, and warehouse management. |

| | |
|---|---|
| | Replaced legacy software, reducing operational costs and improving productivity.<br>**Role:** Software Development Engineer<br>**Responsibilities:**<br>• **Developed and customized modules**: Proposal, Workflow, Project, HR (attendance, overtime, leave, shift scheduling, recruitment), Notification channels (mail/web), Dashboard.<br>• **Deployed ERP for multiple companies** in various industries**:**<br>  ○ Urban greenery (Vietnam Trees)<br>  ○ Garment (KLW)<br>  ○ Refrigeration & household appliances (Nagakawa)<br>  ○ MEP & construction (IDMEA)<br>• Customized modules per industry needs (Production, HR, Accounting, Attendance, Proposal–Approval workflow).<br>• Backend development **(Python/Odoo)** and frontend customization **(XML, JS).**<br>• Managed Odoo environments using Docker, ensuring consistent deployment.<br>• Authored detailed **technical specifications** for modules.<br>• Conducted **unit testing, UAT**, bug fixing, and performance optimization.<br>• Collaborated with stakeholders and operations team to ensure system stability.<br>• **Migrated** Base → Odoo, **saving 100% licensing costs**.<br>**Tech stack:** Python, XML, JavaScript, PostgreSQL, Odoo, Git |
| **Hachinet Vietnam JSC**<br>IT Engineer Staffing *(Jul 2020 – Jul 2023)* | **Project:** RJ Travels Web Portal<br>**Description:** Web application for managing cruise, railway, resort, and tour services with professional customer support.<br>**Role:** Fullstack Developer<br>**Responsibilities:**<br>• Built frontend using Angular 16 + Vex Template.<br>• Containerized backend services with Docker for multi-environment development.<br>• Backend with ASP.NET Boilerplate (ABP).<br>• Database design & query optimization.<br>• Source control with Git, unit testing, bug fixing.<br>**Tech stack:** Angular 16, Vex Template, ASP.NET Boilerplate (ABP), MS SQL Server, Git |
| | **Project:** Lightning BIM (ARENT Inc. Japan)<br>**Description:** 3D interactive software integrated with Revit, supporting rebar arrangement optimization.<br>**Role:** Developer (C# + Revit API)<br>**Responsibilities:**<br>• Researched & implemented Revit API features.<br>• Developed UI, rebar processing, clash detection, and section views.<br>• Managed source code with Semantic Versioning. |

| | |
|---|---|
| | • Data storage with Extensible Storage.<br>• Wrote tests with NUnit, Revit.TestRunner.<br>**Tech stack:** C#, WPF, .NET Framework 4.7.2, Revit API, YouTrack, Git |
| | **Project:** eGOV (**Bkav Corporation**)<br>**Description:** E-Government document management system.<br>**Role:** Full Stack Developer<br>**Responsibilities:**<br>• Requirement analysis & module development: documents, processing, permissions, workflows.<br>• Interactive UI with BackboneJS, integrated with ASP.NET MVC5 APIs.<br>• Testing, debugging, performance optimization.<br>**Tech stack:** C#, ASP.NET MVC5/WebAPI, Entity Framework 6, BackboneJS, Bootstrap, MySQL |
| **DFT Vietnam Technology JSC**<br>*Full Stack Developer (Jun 2018 – Jun 2020)* | **Project:** FinPortal (Thinh Phat Portal)<br>**Description:** Internal financial platform for document management, cash flow tracking, and real-time financial analysis.<br>**Role:** Backend Developer<br>**Responsibilities:**<br>• Designed & implemented financial document management APIs.<br>• Integrated reporting features for departments.<br>• Collaborated with BA for testing & feature enhancements.<br>**Tech stack:** ASP.NET Boilerplate (ABP), C#, Angular, SQL Server, ChartJS |
| | **Project:** Mobifone Customer Portal (MobiFone Corporation)<br>**Description:** Customer portal for telecom services: account management, top-up, packages, and service registration.<br>**Role:** Full Stack Developer<br>**Responsibilities:**<br>• Developed account management, transaction history, and promotion modules.<br>• Built responsive UI for mobile users.<br>• Participated in deployment & maintenance.<br>**Tech stack:** ASP.NET Boilerplate (ABP), C#, Angular, SQL Server, Bootstrap |
| **ezCloud Global**<br>*Full Stack Developer (Nov 2016 – Jun 2018)* | **Project:** ezFolio<br>**Description:** Comprehensive hotel management system for booking, guest management, pricing, housekeeping, business reports, and OTA integration (Agoda, Booking.com).<br>**Role:** Full Stack Developer<br>**Responsibilities:**<br>• Developed booking, calendar, dynamic pricing, and staff permission features.<br>• Designed user-friendly UI for hotel operators.<br>• Integrated with OTA channels via API.<br>**Tech stack:** ASP.NET MVC5, C#, MS SQL Server, Vue.js, Bootstrap |
| **EDUCATION** | |
| **National University of Civil Engineering (NUCE)** (*Sep 2013 – Mar 2018)* | Bachelor's Degree in Software Technology |
