PROFESSIONAL SUMMARY

- **1.5 years of experience in ERP development and customization on the Odoo platform,** mainly for internal enterprise environments.
- **5 years of experience in .NET/C# software development,** covering backend, frontend, and database.
- **Versatile team member** in a 5-person team: **primarily Developer** (backend + frontend), while also **handling testing (unit test/UAT) and technical documentation.**
- Proficient in **requirements analysis**, feature design, programming, testing, and ERP solution deployment.
- Experienced in **migration from Base to Odoo**, enabling cost savings, process optimization, and improved autonomy in technology usage

KỸ NĂNG CHUYÊN MÔN

ERP & Low-Code Platforms	Odoo (module development with Python, XML), migration Base → Odoo
Languages & Frameworks	Python (Odoo), C#, ASP.NET MVC/WebAPI, Entity Framework, ABP Framework
Frontend	XML, JavaScript/TypeScript, Vue.js, Angular, jQuery, Bootstrap, MaterialUI
Database	MS SQL Server, MySQL, Oracle, Postgres
Testing & DevOps	xUnit, NUnit, UAT, Git, Docker (setup development environment & containerized deployment for Odoo/.NET systems)
Documentation & Design	BRD, Technical Specification, UML, REST API design
Task/Bug Management	Jira, Youtrack
IDEs/Utilities	Visual Studio Code, Visual Studio, Postman, Dbeaver,…
Operating Systems	Linux-based, Windows
Languages	English – Basic (able to read technical documents, write emails, and handle simple work communication)

WORK EXPERIENCE

Nagakawa Corporation *ERP Developer (Aug 2023 – Present)*	**Project:** Internal ERP System for Manufacturing Enterprises **Description:** Built an ERP system tailored for medium-sized manufacturing businesses to digitize processes: proposal & approval, project planning, HR management, internal announcements, operations overview, accounting, and warehouse management.

	Replaced legacy software, reducing operational costs and improving productivity. **Role:** Software Development Engineer **Responsibilities:** • **Developed and customized modules**: Proposal, Workflow, Project, HR (attendance, overtime, leave, shift scheduling, recruitment), Notification channels (mail/web), Dashboard. • **Deployed ERP for multiple companies** in various industries**:** ○ Urban greenery (Vietnam Trees) ○ Garment (KLW) ○ Refrigeration & household appliances (Nagakawa) ○ MEP & construction (IDMEA) • Customized modules per industry needs (Production, HR, Accounting, Attendance, Proposal–Approval workflow). • Backend development **(Python/Odoo)** and frontend customization **(XML, JS).** • Managed Odoo environments using Docker, ensuring consistent deployment. • Authored detailed **technical specifications** for modules. • Conducted **unit testing, UAT**, bug fixing, and performance optimization. • Collaborated with stakeholders and operations team to ensure system stability. • **Migrated** Base → Odoo, **saving 100% licensing costs**. **Tech stack:** Python, XML, JavaScript, PostgreSQL, Odoo, Git
Hachinet Vietnam JSC IT Engineer Staffing *(Jul 2020 – Jul 2023)*	**Project:** RJ Travels Web Portal **Description:** Web application for managing cruise, railway, resort, and tour services with professional customer support. **Role:** Fullstack Developer **Responsibilities:** • Built frontend using Angular 16 + Vex Template. • Containerized backend services with Docker for multi-environment development. • Backend with ASP.NET Boilerplate (ABP). • Database design & query optimization. • Source control with Git, unit testing, bug fixing. **Tech stack:** Angular 16, Vex Template, ASP.NET Boilerplate (ABP), MS SQL Server, Git
	Project: Lightning BIM (ARENT Inc. Japan) **Description:** 3D interactive software integrated with Revit, supporting rebar arrangement optimization. **Role:** Developer (C# + Revit API) **Responsibilities:** • Researched & implemented Revit API features. • Developed UI, rebar processing, clash detection, and section views. • Managed source code with Semantic Versioning.

	• Data storage with Extensible Storage. • Wrote tests with NUnit, Revit.TestRunner. **Tech stack:** C#, WPF, .NET Framework 4.7.2, Revit API, YouTrack, Git
	Project: eGOV (**Bkav Corporation**) **Description:** E-Government document management system. **Role:** Full Stack Developer **Responsibilities:** • Requirement analysis & module development: documents, processing, permissions, workflows. • Interactive UI with BackboneJS, integrated with ASP.NET MVC5 APIs. • Testing, debugging, performance optimization. **Tech stack:** C#, ASP.NET MVC5/WebAPI, Entity Framework 6, BackboneJS, Bootstrap, MySQL
DFT Vietnam Technology JSC *Full Stack Developer (Jun 2018 – Jun 2020)*	**Project:** FinPortal (Thinh Phat Portal) **Description:** Internal financial platform for document management, cash flow tracking, and real-time financial analysis. **Role:** Backend Developer **Responsibilities:** • Designed & implemented financial document management APIs. • Integrated reporting features for departments. • Collaborated with BA for testing & feature enhancements. **Tech stack:** ASP.NET Boilerplate (ABP), C#, Angular, SQL Server, ChartJS
	Project: Mobifone Customer Portal (MobiFone Corporation) **Description:** Customer portal for telecom services: account management, top-up, packages, and service registration. **Role:** Full Stack Developer **Responsibilities:** • Developed account management, transaction history, and promotion modules. • Built responsive UI for mobile users. • Participated in deployment & maintenance. **Tech stack:** ASP.NET Boilerplate (ABP), C#, Angular, SQL Server, Bootstrap
ezCloud Global *Full Stack Developer (Nov 2016 – Jun 2018)*	**Project:** ezFolio **Description:** Comprehensive hotel management system for booking, guest management, pricing, housekeeping, business reports, and OTA integration (Agoda, Booking.com). **Role:** Full Stack Developer **Responsibilities:** • Developed booking, calendar, dynamic pricing, and staff permission features. • Designed user-friendly UI for hotel operators. • Integrated with OTA channels via API. **Tech stack:** ASP.NET MVC5, C#, MS SQL Server, Vue.js, Bootstrap
EDUCATION	
National University of Civil Engineering (NUCE) (*Sep 2013 – Mar 2018)*	Bachelor's Degree in Software Technology
